

Capstone Day 2 - Project Setup and First Tests Report

Day 2 implements the trainer Day 13 and Day 14 topics on the selected nopCommerce capstone website.

Trainer Topics Covered

Trainer Topic	Capstone Implementation
Playwright Test setup	Created package.json, playwright.config.js, and tests folder.
test and expect	Used @playwright/test with test() and expect() in spec files.
Locators, fill, click	Used nopCommerce login form fields and login button.
Data-driven testing	Used loginData array for login validation cases.
Helper function reuse	Created tests/utlis.js with reusable login and search helpers.
Screenshots	Captured login button and full-page screenshots.
ES module import/export	Created op.mjs and cal.mjs, then verified them in module-practice.spec.js.
path module	Used path.resolve(process.cwd()) in module practice test.

Files Created

File / Folder	Purpose
package.json	Project metadata and Playwright Test dependency.
playwright.config.js	Playwright Test configuration for nopCommerce.
tests/login.spec.js	Login validation, data-driven test, screenshots.
tests/search.spec.js	Search result page check for product keyword.
tests/utlis.js	Reusable helper functions.
tests/op.mjs and tests/cal.mjs	ES module import/export practice.
tests/module-practice.spec.js	Test for calculator module and path usage.
run_day2.bat	Simple runner file for Day 2 tests.

Tests Performed

- Checked blank email validation on nopCommerce login page.
- Checked invalid email format validation using browser validation message.
- Captured login button screenshot and full login page screenshot.
- Opened search result page for computer keyword and verified search content.
- Verified ES module import/export using calculator module practice.

Execution Result

Day 2 test run completed successfully: 5 passed, 0 failed.

How To View The Work

- Open the Capstone Day 2 folder to view package.json, playwright.config.js, tests, screenshots, and this PDF.
- Open playwright-report folder after execution to view the HTML report.
- Open screenshots folder to view the captured login button and full-page screenshots.
